

BOOST YOUR POWER WITH DHL INTEGRATION

MyDHL API

MyDHL API combines the benefits of DHL Express with your in-house shipping processes. Integrating into your website, it connects with your existing order entry, warehouse management and other business software systems to help you run a more streamlined and efficient operation.

Simply integrate.

A woman with dark, curly hair, wearing a yellow tank top and a blue and white striped apron, is looking down at a tablet computer she is holding. She is in a kitchen setting. In the background, there are kitchen items like a wooden spoon and a bowl. A chalkboard sign is visible in the lower left corner of the image, listing items like 'CHEESY BUTTER', 'BUTTERNUT, C', and '& CINNAM'.

CHEESY BUTTER
BUTTERNUT, C
& CINNAM

Supports
industry standard
REST formats
& more

OPTIMIZE AND GROW YOUR BUSINESS:

- Integrate DHL Express functions – such as fulfilment processes – into your existing system seamlessly
- Access shipping options and rates for DHL Express without the need to switch programs or re-enter information
- Retain the user interface your teams are familiar with – no need for timely and costly employee training
- Sell more at your e-commerce checkout by offering DHL Express shipping products, Landed costs and On Demand Delivery

CREATED FOR DEVELOPERS:

- A single API based on industry standards that developers know and understand
- Built with the fast-paced warehouse and time-sensitive e-commerce checkout in mind
- Dedicated API environment to test your solution
- Developer support from local DHL API experts

DO MORE WITH MyDHL API:

- **Shipment Creation** – shipment labels returned directly from the API
- **Tracking** – get the latest shipment information instantly
- **Pickups** – book your DHL Express courier
- **Returns** – create return labels on demand or in advance for your shipments
- **Rating and Capability** – find the transit time and costs for a shipment
- **And more features like** – Paperless Trade, On Demand Delivery & Landed Costs
